

THE
S40
FREESTANDING GAS STOVE

High Efficiency

The S40 has an impressive efficiency rating, due in part to the innovative heat exchanger design.

5/16" Steel Plate

The S40 integrates heavy duty 5/16" thick steel plate in its construction.

Fluted Liner

Enviro's new charcoal fluted liner adds a touch of modern design.

Variable Speed Fan

The S40 comes with a 150 CFM variable speed fan included standard.

Log Set

An ultra high definition 9 piece ceramic log set gives the S40 a natural looking burn with a beautiful glow.

Ceramic Burner

Instead of a typical steel burner tube, the S40 uses a ceramic burner to blend in with the log set.
